ABOUT ME

I graduated with a bachelor's degree in computer science in 2024. My frequent internships, particularly full-time internships in business analysis, have given me practical experience to support my thorough work on documentation, requirement gathering, and project management. skilled in Jira and Agile and SDLC processes, I'm excited to contribute value in a business analyst capacity using my technical and analytical skills for this rapidly expanding company.

WORK EXPERIENCE

Junior Business Analyst Intern

Amizhth Techno Solutions Pvt Ltd
Jan 2024 - June 2024

During my internship as a Junior Business Analyst at Amizhth Techno Solutions Pvt Ltd, I gained practical experience in business analysis. I used Jira for project management and tracking, and learned about Agile methodology and SDLC. This helped me adapt to changing project environments. I also worked on requirement analysis, created and ran test cases, and documented processes to ensure all project needs were met.

- Utilized Jira for project management and issue tracking.
- Gained hands-on experience with SDLC and Agile methodologies.
- Developed and executed test cases.
- Documented current processes to ensure all project requirements were thoroughly captured and met.

Web Developer and Web Designer Intern

Spiegel Technologies - Blockchain Development company
June 2023 - Spetember 2023

During my three-month internship, I built responsive web pages with HTML, CSS, and JavaScript, developed backend functionality with PHP and SQL, and managed databases using phpMyAdmin. I also improved web functionality with jQuery and CodeIgniter. This experience complemented my business analyst role by enhancing my technical skills and ability to create user-friendly solutions, making me well-rounded in both development and analytical tasks.

- Developed backend functionality with SQL and PHP; managed databases using phpMyAdmin.
- Worked with jQuery and CodeIgniter to enhance web functionality.
- Completed projects include a CRUD application with image upload, user/admin login pages with database connection, PayPal payment integration, and a responsive portfolio.
